

50106 High School Student Dual Enrollment

The Board encourages an early acquaintance with college course offerings through its policy of dual enrollment for selected high school students.

High school students attending a dual enrollment class at a high school location who are academically prepared and are recommended by their principal, counselors, subject area instructors, parents or guardians are eligible to enroll as dual enrollment students and may receive college credit in addition to high school credit for the class. High school students interested in enrolling in Metropolitan Community College classes, offered outside of a high school location, are referred to the College Catalog or web site for enrollment procedures. High school students enrolled at the College will receive grades and credit for their College work where applicable.

The President will establish procedures for dual enrollment and will provide timely information about College services and offerings to the high schools through the College staff.

(Amended 4/26/11; 4/28/15)
