

## **40102 Career/Technical Education**

Career/technical education programs shall be designed to meet the increasing demand for technicians, semi-professionals, and craftspeople for employment in industry, business, professions, and government. The curricula are planned to meet the needs of both employers and employees in the College's service area. To accomplish this, programs are designed to include both career/technical courses and appropriate academic support courses. Programs may also include cooperative work experiences which place students in work situations related to their educational programs.

(Amended 11/20/84; 11/19/13)
