

50102 Academic Advising and Counseling for Students

A staff of professional counselors is provided in addition to a system of academic advisors.

Academic Advising

Academic advisors will assist students in planning their programs of study. Students are encouraged to seek information and assistance from their advisors, not only in planning their programs of study, but also in their career and occupational planning and to prepare for transfer to four year colleges and universities.

Counseling

Counseling is an important service to be provided for students at the College. The counseling staff will assist students in making decisions regarding vocational, educational and personal plans. A student may seek assistance with special problems arising from academic performance, career choices or personal adjustment. Counselors will also provide services to students needing accommodations for disabilities.
