

Fire Science Technology

Every year, fires and other emergencies take thousands of lives and destroy property worth billions of dollars. Firefighters help protect the public against these dangers by rapidly responding to a variety of emergencies. They are frequently the first emergency personnel at the scene of a traffic accident or a medical emergency and may be called upon to put out a fire, treat injuries or perform other vital functions.

Firefighting involves hazardous conditions and long, irregular hours. About nine out of 10 firefighting workers are employed by municipal or county fire departments. Applicants for municipal firefighting jobs generally must pass written, physical and medical examinations. Although employment is expected to grow faster than average, keen competition for jobs is expected because this occupation attracts many qualified candidates.

Application deadlines

- Applications are due one week before classes start.
- New classes start every quarter.

Schedule changes (such as dropping a course) are the responsibility of the student. The changes must follow College procedures, refund policies and deadlines at all times. Students are not always entitled to refunds for classes that are dropped, depending on when the courses are dropped. Students are responsible for any tuition and fees that are not refunded.

Admission process

Students admitted to the Fire Science Technology program must:

- Hold a current driver's license and be able to pass a physical exam performed by the MCC Fire Science medical director
- Obtain an application packet from any Student Services location or online at mccneb.edu
- Submit completed application to the Health Careers office, South Omaha Campus, Mahoney Building, room 519 or mail to:

Metropolitan Community College
Health Careers
P.O. Box 3777
Omaha, NE 68103-0777

It is recommended students keep a copy of all required paperwork. Copies of paperwork will not be available after the end of the quarter.

EMSP 1000 is not required for FIST, however it is the proper CPR credential needed for Paramedicine and EMT. If a student is interested in going on to Paramedicine and EMT, EMSP 1000 will be required. The director of the FIST program will work with the student on substituting EMSP 1000 for EMSP 1010 if needed.
